Malappuram, Kerala - 673642, India

PROFESSIONAL SUMMARY

Junior Software Engineer with 1.5+ years of professional experience specializing in frontend development using React.js, Next.js, TypeScript, Redux Toolkit, and modern UI technologies. Experienced in building scalable admin dashboards, HRMS platforms, booking systems, and business management applications. Skilled in API integration, state management, form validation, responsive design, and performance optimization. Possesses working knowledge of full-stack development with Node.js, Express.js, MongoDB, and PostgreSQL. Currently pursuing a Bachelor of Computer Applications (BCA) while contributing to production-grade software solutions in a collaborative development environment.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Web Technologies:** React.js, Next.js, Redux Toolkit, RTK Query, React Hook Form, Zod, REST API Integration
- **Styling & UI:** Tailwind CSS, Shadcn UI, Bootstrap, SCSS, Material UI, Responsive Web Design
- **Backend Technologies:** Node.js, Express.js, JWT Authentication, Socket.IO
- **Database Systems:** MongoDB, PostgreSQL
- **Cloud & Tools:** Git, GitHub, AWS, NGINX
- **Development Tools & Concepts:** MVC Architecture, State Management, Form Validation, Multer, Figma, Browser Developer Tools

PROFESSIONAL EXPERIENCE

• Junior Software Engineer – Front-End Focus

Luvud Technologies

Luvud Technologies, Calicut, Kerala (Dec 2024 – Present)

- Developed and maintained production-ready web applications using React.js, Next.js, TypeScript, and Redux Toolkit.
- Integrated REST APIs and implemented efficient data-fetching strategies using RTK Query.
- Built responsive and accessible user interfaces using Tailwind CSS and Shadcn UI.
- Collaborated closely with backend developers to deliver scalable business applications.
- Optimized application performance, resolved bugs, and maintained clean, reusable code.
- Assisted new team members in understanding frontend architecture, API integration workflows, and development practices.

PROFESSIONAL PROJECTS

• CRM & Business Management Portal

Tools: Next.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, Node.js, Express.js, MongoDB

- Developed a centralized CRM and business management platform used to manage enquiries, quotations, projects, payments, and expenses.
- Built a dynamic form builder system that enables users to create and share customizable forms similar to Google Forms and Web3Forms.
- Developed modules for blog management, website content management, and business operations administration.
- Created reusable UI components, complex business workflows, and responsive administrative dashboards.
- Contributed to backend API development and data integration to support platform-wide functionality.

• Arnoc – Car Wash & Vehicle Service Management Platform

Tools: Next.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn UI, Node.js, Express.js

- Developed the complete administrative portal for a vehicle service and car wash booking platform.
- Built modules for customer management, booking operations, service tracking, and business workflow management.
- Integrated backend APIs and implemented efficient server-state management using RTK Query.
- Developed selected backend APIs to support operational and administrative features.
- Created responsive dashboards and management interfaces using Next.js and modern UI components.

• HRMS System – Human Resource & Payroll Management

Tools: React.js, JavaScript, Redux Toolkit, RTK Query

- Developed a comprehensive HRMS platform for managing employee lifecycle and payroll operations.
- Built modules for employee management, attendance tracking, leave management, payroll processing, and reporting.
- Implemented payroll workflows supporting PF, ESI, TDS calculations, salary revisions, and appraisal management.
- Developed role-based interfaces and administrative dashboards to streamline HR operations.
- Integrated REST APIs using RTK Query and managed application state with Redux Toolkit.
- Created reusable components and complex business forms to improve maintainability and user experience.

FEATURED PROJECTS

- **Home Heaven – Home Rental Platform**
Tools: React.js, Redux, Node.js, Express.js, MongoDB, JWT, SCSS, Material UI, Socket.IO
 - Developed a full-stack property rental platform with user authentication, property listings, and wishlist management.
 - Implemented secure authentication and authorization using JWT and Bcrypt.
 - Built advanced property filtering, search functionality, and booking workflows.
 - Integrated image upload with drag-and-drop support and media storage.
 - Managed global application state using Redux and developed responsive user interfaces using Material UI and SCSS.
 - Implemented real-time chat functionality using Socket.IO, allowing property owners and renters to communicate directly regarding bookings and property inquiries.
 - **FurniHub – Full Stack E-Commerce Platform**
Tools: Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, AWS
 - Developed a full-stack e-commerce platform with user authentication, product management, shopping cart, and order processing features.
 - Implemented Google OAuth authentication and secure backend APIs for user and product management.
 - Designed and developed administrative modules for managing products, users, and orders.
 - Utilized MongoDB and Mongoose for database management and schema design.
 - Deployed the application on AWS and optimized performance for production environments.
 - **GeoFinder – Real-Time Location Discovery Platform**
Tools: Next.js 15, TypeScript, Tailwind CSS v4, Shadcn UI, Framer Motion, Geolocation API
 - Developed a modern location discovery platform capable of retrieving precise GPS coordinates directly from the browser.
 - Implemented reverse geocoding to convert latitude and longitude into human-readable address information.
 - Built interactive location dashboards featuring nearby place discovery, weather insights, and live location tracking.
 - Designed responsive glassmorphism-based user interfaces using Tailwind CSS and Shadcn UI.
 - Implemented SEO best practices including dynamic sitemap generation, robots.txt configuration, and LLM-friendly metadata optimization to improve discoverability.
 - Enhanced user experience through smooth animations, transitions, and Progressive Web Application (PWA) capabilities.
 - **Admin Dashboard Template**
Tools: Next.js, TypeScript, Tailwind CSS, Shadcn UI
 - Developed a reusable admin dashboard starter template for rapid application development.
 - Built reusable layouts, navigation systems, form components, tables, modals, and dashboard widgets.
 - Implemented responsive design patterns and scalable component architecture using Shadcn UI.
 - Structured the project for easy integration of authentication, API services, and business modules.
 - Focused on maintainability, code reusability, and developer productivity for future projects.
